

# NOx-sensors

**NOx sensors measure the concentration of nitrogen oxides in the exhaust, ensuring compliance with environmental regulations. A defect in the NOx sensor leads to reduced engine performance and inadequate exhaust treatment.**

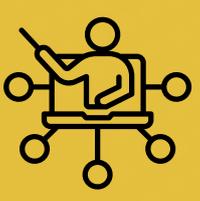

**With over 550 articles (12V/24V), #GEBE offers the most extensive range in the independent aftermarket.**

**Our in-house product development and testing in our laboratory, along with long-term tests in collaboration with our workshop partners, ensure the high quality and reliability of #GEBE products.**

**We perform the adaptation of software updates (for product improvement measures by vehicle manufacturers) in our laboratory.**

**A comprehensive training and education program on sensor modules in the exhaust system, along with our technical support hotline, complete the #GEBE service offering.**
