

# Glow Time Control Units & Accessories

Glow time control units from GEBE ensure that glow plugs in diesel engines are activated at the optimal time, enabling smooth engine start-up in cold conditions.

The vehicle-side connector for the main power supply to the control unit often becomes porous and deformed. For this, we offer the accessory cable with the GEBE part number 9 9660 1.

With 40 part numbers, we offer extensive vehicle coverage for popular automotive brands.

For more information, visit: [www.gebe-shop.de/preheating-relays](http://www.gebe-shop.de/preheating-relays)

A comprehensive training program on sensor assemblies in the exhaust system and our technical support hotline complete the #GEBE service offering.
